SUMMARY

I am a Computer Science Engineering student at SRM AP University. I am passionate about exploring with a strong focus on front end development, C++.

SKILLS

Programming Languages	C, C++, Python , Basics of java
Web Development	HTML, CSS, JavaScript, PHP, SQL, ReactJs, MongoDB, Node js
Tools	VS Code, MySQL, Google Colab

WORK EXPERIENCE

Edunet Foundation ● Internship   Jun 2024 - Jul 2024

Developed an employee burnout prediction model using AI/ML techniques. Worked on data analysis, model training, and optimization. Gained hands-on experience in deep learning and predictive analytics.

PROJECTS

Sports Event Management – Software Engineering Project   GitHub

Created a sports event management system using HTML, CSS, JavaScript, and PHP. User-friendly interface for event registration and scheduling. Managed participants and tracked results with responsive design.

Food-Delivery App – Web Development   GitHub

Developed Foody, a MERN stack food delivery application enabling users to browse restaurants, place orders, and track deliveries in real time.

School Database Management System – DBMS   GitHub

Created a School Database Management System to manage student enrollment, track attendance, and store academic records. Simplifies school administration and provides quick access to important information
